

Experience the power of Carboxy Gel with our

ProGlow Jelly Mask

Improves the skin's elasticity without the need for an invasive procedure. The innovative gel treatment is gentle enough to apply even on your eyelids and lips.

After just one use, CO2Lift Pro:

- ✓ Increases skin's hydration by 117%
- ✓ Lifts and tightens skin
- ✓ Reduces wrinkles, lines and pore size
- ✓ Smoothes skin texture
- ✓ Brightens skin tone
- ✓ Reduces redness and swelling

Brittany F: CO2Lift Pro User

This is the best mask I have ever used! My skin was glowing for 6 days. I'm getting married in 6 months and will be using this mask leading up to it to give me a wedding day glow.

How it Works

Carbon dioxide is created when the water in one packet mixes with the Gluconolactone in the second packet to form a mild acid. It then mixes with the Magnesium Carbonate to create CO₂.

The gel is applied to the desired area and forms a mask that holds the CO₂ into the skin.

Once applied, the gel sits for 35 minutes to an hour so that the CO₂ is absorbed. Peel off to reveal radiant, younger looking skin.

The Fastest Way to Better Skin.

APPLICATION INSTRUCTIONS

How to Mix and Apply CO2Lift® Pro Carboxy Gel

- 1 Massage the small packet to soften before opening.
- 2 Empty the entire contents of large pack and small pack into a small mixing bowl.
- 3 Mix thoroughly for 1 minute to activate the carboxy.
- 4 Apply immediately to the area being treated with the small application stick. If applying to the face, start under the eyes, move up to the lash line, including the lips, and end with the eyelids.
- 5 Make sure the application layer is thick, like frosting a cake.
- 6 Leave on for 35-45 minutes.
- 7 Remove with application stick.

Caution: For external use only. Avoid contact with eyes, and if contact occurs, rinse thoroughly with cool water. Keep out of reach of children. Store at temperatures between 5°C and 25°C. The product should be used entirely immediately after opening.
